

## EU4Business: Connecting Companies

**Duration:** 01.01.2020 - 31.12.2023

**Countries:**

Armenia, Azerbaijan, Belarus, Georgia, Republic of Moldova, Ukraine

**EU contribution:** € 6 500 000

**Implementer:**

Eurochambres

**Website(s):** [connectingcompanies.eu](http://connectingcompanies.eu)

**Project description:**

The "EU4Business: Connecting Companies" project aims to promote trade between the EU Member States and the six Eastern Partner countries, focusing in particular on five sectors of economic activity with a significant potential for SME export growth – Organic Food, Creative Industries, Textiles, Tourism and Wine-making.

**Social media:**

<https://twitter.com/EU4BCC>, [facebook.com/EU4BCC](https://facebook.com/EU4BCC),

**Expected results:**

- Business to Business matching: a call for proposals has been launched and SMEs will be selected by European Sectoral Consortia through a transparent procedure based on eligibility criteria in accordance with EU rules. The aim is to explore opportunities for cooperation, working on the creation of a common product or service.
- Study visits: these will offer the possibility to learn "on site" from other BSOs, build understanding on the Eastern partner countries within the EU business community and vice versa, and offer an opportunity for networking. Each study visit will have a specific focus, which can be thematic (e.g. Internationalisation service, women entrepreneurship), or sectoral (e.g. agri-food, textiles).
- Twinnings (defined as Capacity Building / peer to peer learning for BSOs, Coaching) in order to establish direct links between the EU BSOs and Eastern partner BSOs. The idea is to increase knowledge on the trade environment and investment opportunities, to allow for peer-to-peer exchanges, sharing of best practices and knowledge, mutual cooperation and knowledge expanding on both sides.

Within the same activity, visits to industrial areas, companies and SMEs of the sector, to local clusters and innovation poles will be encouraged, in order to expose BSOs to the local context and business environment.
