Project website: ansa.gov.md/en/node/4197

Project description:

With European Union support, laboratory diagnostic testing kits for animal diseases are made available to the National Veterinary Reference Laboratory. This includes testing kits for identification of Salmonella, Classical and African Swine fever, Avian influenza, Newcastle disease, Foot-and-mouth disease, or Blue tongue disease, among others.

Expected results:

- Increased surveillance, testing and detection of animal diseases by the National reference laboratory, according to Annual monitoring plans.
