Project description:
The project aims to improve the quality of urban development, citizens' satisfaction and public services in Edinet municipality through the implementation and evaluation of smart solutions in different fields of urban development: e-local governance, urban mobility, public lightening, water supply, public security, green area management, business, education and living conditions. The smart solutions will be selected based on inhabitants opinion regarding local challenges and priorities in each field of urban development.
The project will be implemented during 48 months. It has started with smart urban planning and will end with the elaboration of a tool kit of smart solutions for small towns from Moldova.

Expected results:
- A participatory and collaborative approach of territorial planning to ensure smart governance is implemented.
- Public urban services optimised using innovative smart solutions tailored to the specific needs in Edinet.
- Promotion of smart living in urban area for better assimilation of innovations and future city infrastructure for sustainable usage of urban space in Edinet municipality.
- Smart solutions implemented for 2 schools and 2 kindergartens.
