PROJECT FACTSHEET

Funded by the European Union

Support for design, tendering, and construction of Balti Regional Hospital

Duration: 13.12.2024 - 12.01.2033

Countries:
Moldova

EU contribution: € 9 488 000

Total budget: € 9 488 000

Implementer:
CEB

Project description:
The present Action will cover the costs of developing the conceptual/preliminary designs and technical/detailed designs and associated technical documentation as well as a part of the construction costs for the Balti Regional Hospital (hereinafter referred to as the "Balti Regional Hospital Project" or the “Project”) - a state-of-the-art tertiary care hospital in the North, with a capacity of 340 hospital beds and 78 beds in the ambulatory services, on a built surface of 38 000 m2. In addition, to being an essential part of Moldova’s health sector reform plans (Government Action Plan for 2021-2022, the National Health Strategy 2022 – 2023), the Project and the Action are in line with the Action Plan on the Implementation of the Moldova-EU Association Agreement.
Furthermore, the Project has been included in Moldova’s Reform Agenda, specifically in the list of investments to be supported under the Reform and Growth Facility.

Expected results:
The expected impact of the project is to improve the health status of women and men, in all their diversity, in the northern region of the Republic of Moldova. In the long term, this will be reflected in an increased life expectancy at birth, with a target value of 80.6 years by 2050 (77.9 years for men and 83.3 years for women).
By 2032, the B?l?i Regional Hospital is expected to become operational, providing modern and high-quality healthcare services to the population of the northern region. The construction of the hospital will support the decentralisation of tertiary healthcare services, bringing essential care closer to people and ensuring faster and more equitable access.
