Project description:

EU4Security Moldova supports the professionalisation and modernisation of Moldova's law enforcement system in line with EU standards. The project helps strengthen the Ministry of Internal Affairs and its agencies through better training, digitalisation, and specialised tools to respond to current and emerging security threats.

The action develops continuous and practical training for police, border police, carabinieri, and emergency responders, ensuring officers are better prepared to serve and protect communities. It introduces modern learning methods, including online platforms, train-the-trainer programmes, and EU-tested needs assessments, to build a sustainable system for professional development.

To address new crime challenges, the project also establishes a cyber lab for investigating digital crime and a national firearms focal point to combat illegal weapons trafficking. At a strategic level, it provides expertise to support Moldova's EU accession path and reforms in public safety and trust.

Ultimately, the project aims to reinforce public confidence in law enforcement, improve cooperation with EU partners, and enhance Moldova's resilience in a complex regional security environment. The main beneficiaries are Moldovan citizens,

Expected results:

1. Creation of a fully functional online learning platform for the Ministry of Internal Affairs.
2. Establishment and equipping of a cyber laboratory.
3. Establishment of a national firearms reference point.
