PROJECT FACTSHEET

Funded by the European Union

EU4PUBLIC ORDER

Duration: 01.09.2024 - 31.08.2027

Countries:
Moldova

EU contribution: € 1 995 665

Total budget: € 1 995 665

Implementer:
Italian Arma dei Carabinieri, Eutalia (for administrative and financial support), EU Delegation to the Republic of Moldova

Project description:
EU4Public Order supports the strengthening of Moldova's law enforcement system by enhancing the institutional and operational capacities of the Ministry of Internal Affairs and the General Inspectorate of Carabinieri. Implemented by the Italian Arma dei Carabinieri under the coordination of the EU Delegation to Moldova, the project promotes alignment with EU Member States' standards and best practices in public order management.
Its key actions focus on capacity building, digitalisation of internal processes, support for the implementation of the reform of public order, and the enhancement of communication and visibility. The initiative aims to develop an accountable and citizen-oriented law enforcement structure that upholds integrity, gender equality, and respect for human rights in all aspects of public order and security. The main beneficiaries are represented by the General Inspectorate of Carabinieri.

Expected results:
The project is expected to strengthen the operational and institutional capacities of the Ministry of Internal Affairs (MIA) and the General Inspectorate of Carabinieri (GIC) by addressing identified priority needs. Law enforcement personnel will receive targeted training on public order management, crowd control, counterterrorism, and human rights compliance at squad, platoon, and company levels. Digitalisation of operational processes will be enhanced through IT System Modules 2 and 5 for Mobile Companies, integrated event logging, operational control, and situational dashboards, enabling real-time data sharing and efficient resource management. Standardised procedures, intervention plans, and classification systems will improve coordination among regional units and align activities with national and EU standards. Procurement of essential IT infrastructure and equipment for GIC regional companies will support field operations and secure communication. Communication and visibility strategies are expected to enhance public trust and transparency. Overall, the project will establish a coordinated, rights-based, and accountable public order system capable of rapid and effective responses to ordinary and critical security situations while ensuring interoperability and operational efficiency.
