PROJECT FACTSHEET

Funded by the European Union

Public Finance and Tax Administration Reform for EU Accession in Moldova – FiT4EU

Duration: 01.06.2026 - 31.05.2029

Countries:
Moldova

EU contribution: € 7 000 000

Project description:

Public Finance and Tax Administration Reform for EU Accession in Moldova - FiT4EU supports the country's EU accession by strengthening how public finances are managed and how taxes are administered. The project works with the Ministry of Finance and the State Tax Service to improve institutional capacity, modernize systems and procedures, and align public finance and tax administration more closely with EU standards and international good practice. Support includes fiscal and budget planning, debt management, public accounting, public investment and procurement, as well as tax information systems, compliance risk management, risk-based audits and tax administration procedures. FiT4EU is co-financed by the European Union, the German Federal Ministry for Economic Cooperation and Development (BMZ) and the Swedish International Development Cooperation Agency (Sida). The Public Financial Management component is implemented by GIZ, while the tax administration component is supported by Sida and implemented by Swedish Tax Agency.

Expected results:

1. The Ministry of Finance has stronger systems and capacity to plan, coordinate, and monitor public finance reforms.
2. Fiscal planning, debt management, and medium-term budgeting are strengthened, supporting more credible and effective management of public resources.
3. Budget execution, treasury procedures, and public sector accounting are improved, contributing to greater transparency and accountability.
4. Public investment and public procurement systems are strengthened to improve effectiveness and value for money.
5. The State Tax Service is better prepared to use modern information systems, risk-based approaches, and improved administrative procedures in line with EU and international tax requirements.
