Website(s): parstat.md/ statistica.gov.md/

Project description:

"Technical assistance to support the National Bureau of Statistics of the Republic of Moldova" is a project aimed to strengthen the National Bureau of Statistics' coordinating role of the National Statistical System and its capacity to access and use administrative registers and other data sources of Moldovan institutions for statistical purposes, by enhancing public trust, high quality and accurateness of data provided and processed.

Expected results:

- Institutional capacity of the NBS for efficient and effective development of national statistics strengthened.
- To ensure the national commitment to the principles and rules of official statistics, by aligning statistical products and services with the existing quality standard.
- The NSS is further harmonized with the EU acquis in statistics to ensure sufficient and reliable evidence for national decision- making and international comparability.
- New technologies are used for statistical production and an integrated information system is developed that covers the whole statistical process.
