Project description:

The project was launched in 2020 as a response to the Government of the Republic of Moldova in its will to fighting corruption and advancing the country on the European integration path. Overall aim of the action is to contribute to the prevention and fight against corruption through various support measures to develop zero tolerance against corruption among Moldovan citizens and strengthening anti-corruption mechanisms including the investigation and prosecution mechanisms, the asset recovery functions, declaration of assets and the prevention of corruption. To achieve its goal, in the three years of implementation, the project bases its activities in three main pathways that include raising awareness of citizens and civil society on the harm of corruption, strengthening anti-corruption institutions their inter-institutional coordination, communication and cooperation with civil society and supporting the implementation of the National Integrity and Anti-Corruption Strategy in three high-risk sectors of corruption, education, health and agrifood.

Expected results:

- Strengthening civil society and working to combat corruption.
- Improving the effectiveness of state and civil society measures to combat and prevent corruption in the Republic of Moldova.
- Support for the National Integrity Authority is aimed at preventing bribery in public office. Declaration of personal assets and revealing conflicts of interest by public office holders and state officials will help prevent abuse of public office.
- Approaching the state's prevention measures systematically and with social engagement, in particular, with regard to implementing the NIAS in high-risk sectors.
