

Twinning Project for the Agency of Land Relations and Cadastre (ALRC)

Period of implementation: 01.02.2014 - 31.12.2016

Geographic coverage:

Chisinau

Photo: EU copyright

Total budget: € 1 122 515

Project description:

The aim of the project is to improve the mapping system in line with European Union standards and international best practices for managing geographic data. Additionally, the activity will provide support to the Agency of Land Relations and Cadastre for the management and update of a mapping system, which is secure, unitary, integrated and cost efficient.

Expected results:

- Awareness of the role of National Spatial Data Infrastructure (NSDI) is increased.
- The National Strategy for Spatial Data Infrastructure of Moldova for 2015-2020 and the Action Plan for its implementation -elaborated.
- The Law on national spatial data infrastructure to be developed.
- The analysis of the training needs to be performed and the training material - elaborated.
- ALFC officials and beneficiaries of the project to be trained in the main Components of the NSDI.
- A Collaboration Agreement on the implementation of the national spatial data infrastructure (INDS) to be elaborated.
- The concept of Business Model for ALFC (including its companies) and Fee Model for data exchange to be introduced.
- The tool for the development of network services to be developed and installed.
- A Cooperation Agreement on the demonstration of the IDS solution in the pilot area to be developed and signed in accordance with EU best practices.
