Project description:

The Project aims to increase the effectiveness of customs procedures at the BCP on the common border between Ukraine and Belarus through enhanced pre-arrival processing capacity, leading to reduced border crossing time.

Expected results:

- Automated intelligent video control system complete with equipment, IT hardware and software, is installed, successfully tested and entered into operation.
- Officers working at the target BCP have the skills and knowledge of the system's use and operation.
- The new system of video-control is installed at the target BCP and fully operational.
