Project description:

The overall objective of the project will be to support the Republic of Moldova (RoM) in the reform of its Energy sector with a view to ensure higher efficiency and higher energy security. It will also support the implementation of the commitments the country undertook as a Contracting Party to the Energy Community and in the framework of the EU-MD Association Agreement. Support will be provided to reinforce the capacities of Moldovan Institutions in charge of the Energy market, in reinforcement of the electricity transmission system and in reinforcement of Energy Planning capacities.

Expected results:

- Reinforcement of capacities of Moldovan Institutions in charge of the Energy sector for them to implement comprehensive and sustainable energy policy.
- Reinforcement of capacities of Moldovan Institutions in charge of the Energy sector to ensure that the RoM fulfils all its international commitments in the sector.
- Provision of support to the Energy Efficiency Fund (EEF) for it to become a fully sustainable institution contributing with success to the reinforcement of Energy Efficiency in the country.
- Reinforcement of capacities of Moldovan Institutions for them to accelerate the implementation of energy interconnection projects.
- Reinforcement of electricity transmission system and strengthening of the capacities to prepare the ground for proper interconnection with EU electricity market.
- Reinforcement of Energy Planning capacities.
- Reinforcement of the transparency of the Energy market with a view to improve its efficiency and improve price-competitiveness of the Energy provided to citizens.
