

EU4Energy Data, Policy and Web Portal

Period of implementation: 01.01.2016 - 31.12.2020

EaP countries:

Armenia, Azerbaijan, Belarus, Georgia, Republic of Moldova, Ukraine

EU contribution: € 12 600 000

Implementing organisation(s):

International Energy Agency

Social media account links:

Project website: eu4energy.iea.org/

Project description:

The aim of the project is to improve the quality of energy data and statistics that are key to sound policy-making. Working with the six countries of the European Partnership and five Central Asian states, the EU4Energy data project provides support to statistics agencies in the region to improve energy statistics and data management, as well as to expand their use in evidence-based policy making.

Expected results:

- EU4Energy Data: enhancing energy data management and use in policy design.
- EU4Energy Policy: fostering energy policy dialogue and knowledge sharing on a wide range of topics related to energy security, sustainable development and markets.
- EU4Energy Web Portal: hosting an interactive web portal that will act as a global hub of information on beneficiary countries, including energy data, energy infrastructure, policy developments and investment projects.
