Project description:
This project is funded by the European Union and the Council of Europe and implemented by the Council of Europe. It aims to:
- improve statistical data collection, analysis and reporting so as to strengthen the capacity of judicial administration to assess the performance of national courts on the basis of objective criteria, to take decisions with regard to the distribution of resources based on needs, efficiency and quality, and to define the indicators and track the records able to demonstrate the effect of judicial reforms;
- put in place an application to facilitate the public access to judicial statistics based on the concept of CEPEJ-STAT database, with a view to increasing the transparency of the court system and the public trust in the judiciary;
- further improve the court management and the capacity of courts to deliver better quality services;
- improve the system of enforcement of court decisions in civil and administrative cases through better management and strengthened capacities and professionalism of bailiffs.
Bailiffs' profession is supported in the implementation of new tools to facilitate its functions, such as the electronic register of enforceable documents/procedures and the on-line platform for auctioning of goods seized as part of enforcement proceedings etc.
